TECHNOLOGIES

## PUMP FILL STATIONS

Volumetric Technologies designs and manufactures the highest quality pump fill stations in the industry. Our Pump Fill Stations pull product from a holding vessel, fill, and seal a wide variety of products that include dairy, bakery, cosmetics, and medical products.

### FEATURES

- ▶ Extremely accurate to within +/- .25 of 1% on homogenous products
- ▶ Contact surfaces constructed from 316L stainless steel and USDA/FDA approved materials
- ▶ Quick tool-free assembly and disassembly
- ▶ Dispensing volume adjustable via handwheel
- ▶ Foot pedal pneumatically operated
- ▶ Stainless steel work surface with tipper tie or heat sealer closure
- ▶ Pouch holder channel
- ▶ Hot or cold product fills

### FUNCTION

The cycle is started by pressing the foot pedal, which provides a single cycle fill. A continuous cycle is also engaged by keeping the foot pedal pressed. This enables for faster cleaning or transferring of product at the end of a production run.

The fill station includes pneumatic flow controls to regulate cycle speed as required. It is designed for daily cleaning by wash down and in-sink cleaning methods without requiring any tools.

PUMP FILL STATIONS

**TOUGH, FAST, ACCURATE**
